# Smile, Save, Share

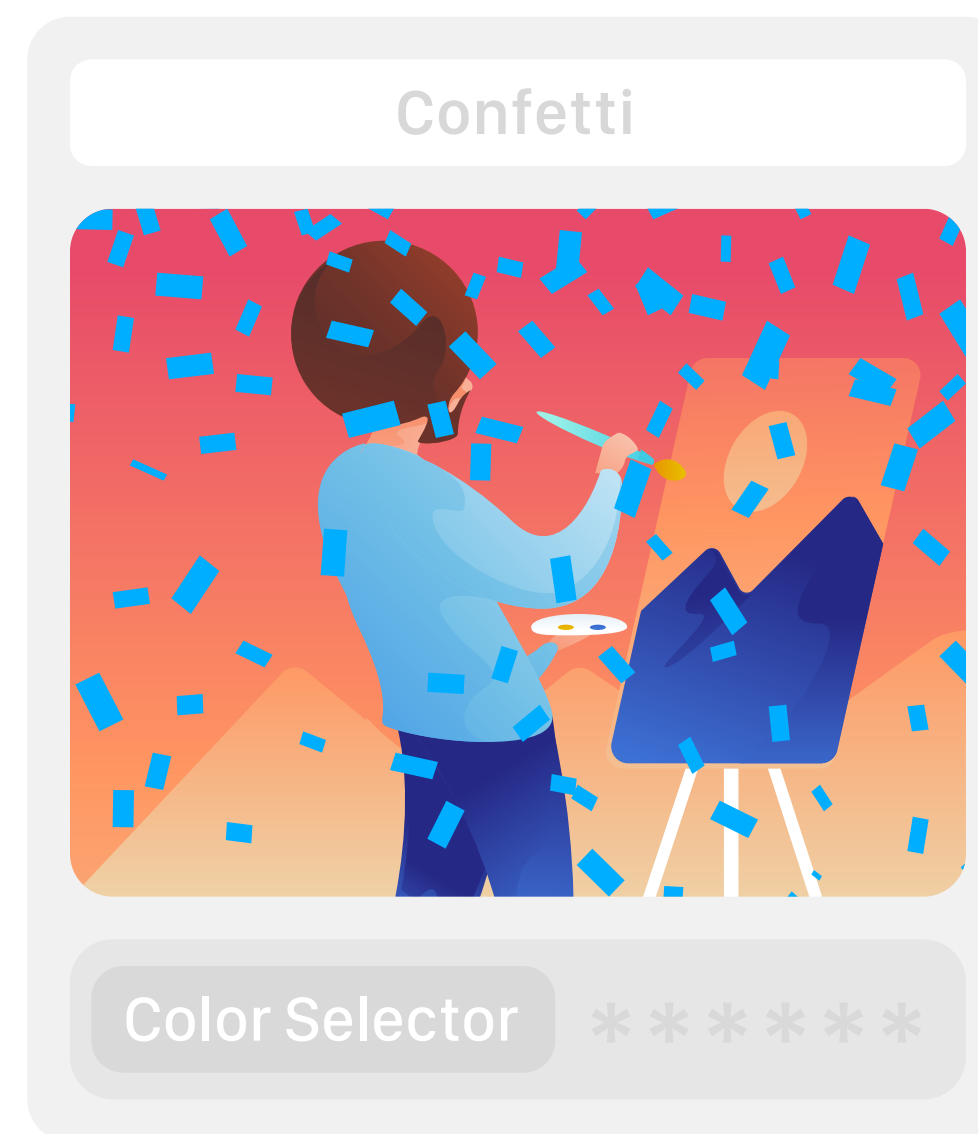

CUE's Synchronized Selfie Cam is a shared experience captured in hundreds or thousands of selfies, all snapped at precisely the same moment.

# Selfie Steps

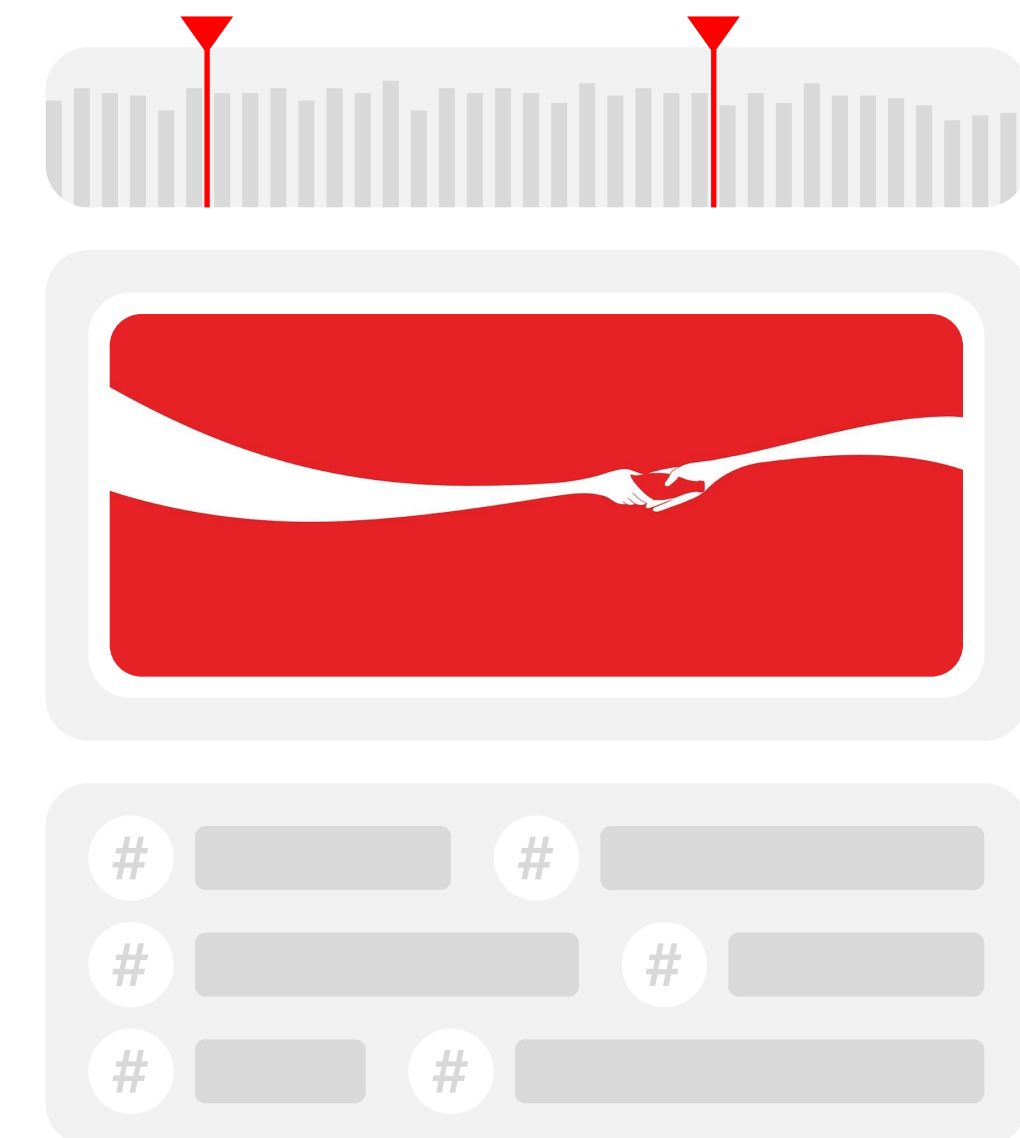

Embed your selfie cam into a custom song, use as a standalone "silent" track, or even feature it at the end of a smartphone light show.

## 1. Customize

Upload custom filters or pull from CUE's library of customizable pre-sets.

## 2. Define Details

Next, define your selfie cam duration, sponsor, and hashtags.

# Share Your Experience

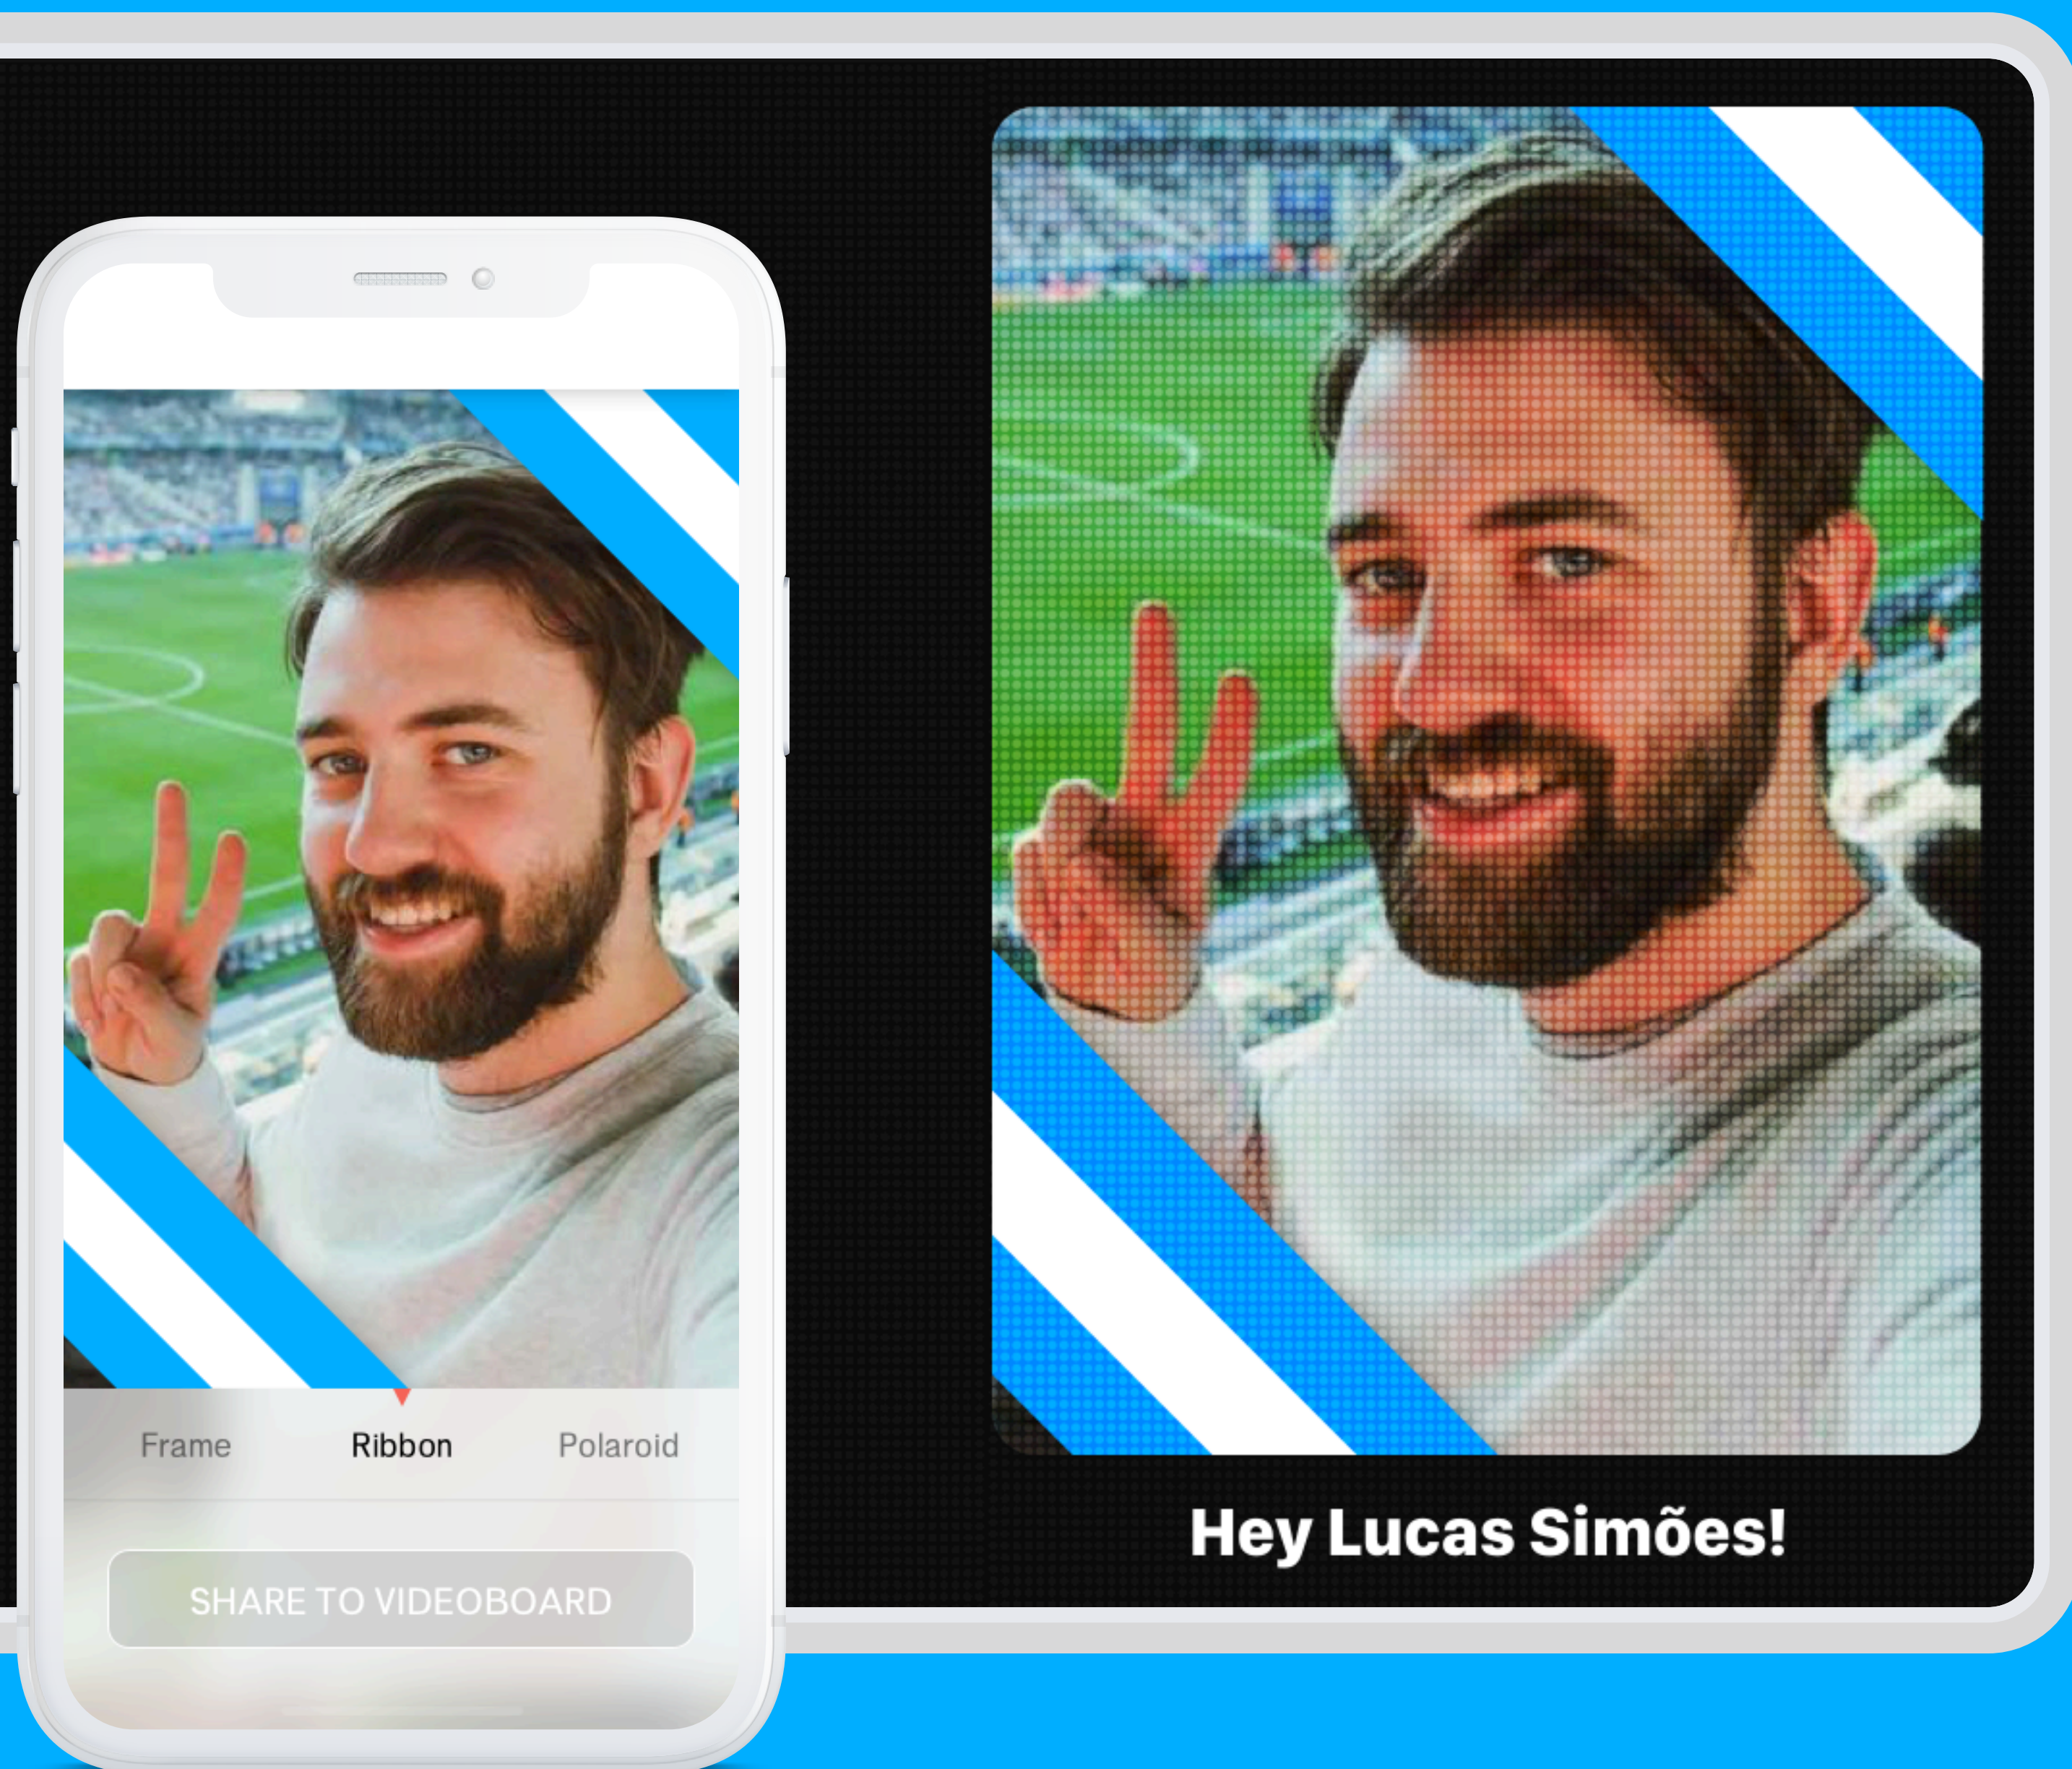

The Synchronized Selfie Cam integrates natively with all social media platforms.

Define default hashtags so users can snap and share a selfie with a single button press.
